Tenure-Track researcher position

The Department of Biological Oceanography, Division of Oceanology, CICESE, announces the following open tenure-track researcher position:

Requirements:

a) Academic:

- Ph.D. in Oceanography, Marine Ecology, or any related field, with experience in primary productivity of phytoplankton in the ocean.

b) Experience:

Candidates should demonstrate experience in current interdisciplinary research techniques, such as the application of chemical tracers, biomarkers, molecular tools, genomics, remote sensing, biogeochemical interactions and modeling to characterize the processes that control primary production of phytoplankton and their interaction with other trophic levels in the ocean. The ideal candidate will also have observational experience in oceanic and coastal biophysical processes. Candidates will be evaluated on their research experience; the number, quality and impact of peer-reviewed publications; as well as a seminar and interviews with researchers from the Division of Oceanology. Responsibilities of this position include maintaining an externally funded research program through national and international funding agencies, as well as collaboration with productive, social and governmental sectors; the supervision of graduate student theses at the M.S. and Ph.D. level; and the teaching of courses in marine ecology, and biological or chemical oceanography.

Selection process:

The process will follow the established institutional procedures and will continue until the position is filled.

Salary:

Salary will be determined according to the Estatuto del Personal Académico del CICESE and the SHCP pay scale. The pay scale category will be determined by the Comisión Dictaminadora Externa of CICESE, depending on experience and publication record.

Application process:

Please email one PDF file with the following documents to the email below:
Tenure-Track researcher position

- CV
- Letter expressing research and teaching interests, a 5 year plan explaining the development of the proposed line of research in the department, as well as potential thesis projects and courses.
- Three letters of recommendation including references and contacts.
