OPEN CALL

TENURE-TRACK RESEARCH POSITION IN OPTICS

The Center for Scientific Research and Higher Education of Ensenada (CICESE), calls for an open competition to occupy a tenure-track position at its Department of Optics of the Division of Applied Physics.

ABOUT THE OPTICS DEPARTMENT

The Department of Optics is a well-established department of more than 45 years. It fulfills two fundamental academic activities: on the one hand, it carries out basic and applied research in the field of optics and photonics; on the other, it is dedicated to training young researchers through Master and PhD programs in optics.

The Department of Optics has a staff of 20 tenured researchers and 4 researchers from the "Researchers for Mexico" program of CONACyT (Mexico's equivalent of USA's NSF). Most of the researchers have international prestige and belong to Mexico's "Sistema Nacional de Investigadores" (National System of Researchers).

The research lines currently being developed at the Department of Optics are light scattering, optical fibers, image processing, nonlinear optics, lasers, laser processing of materials, advanced microscopy, integrated optics, optical sensors, plasmonics, optics and quantum information, nano-optics and biophotonics.

CHARACTERISTICS AND REQUIREMENTS:

The Department of Optics offers a tenure-track position to reinforce its current research activities and possibly start a new line of research.

Profile:

We are seeking a candidate that can carry out cutting-edge scientific research on topics that are also attractive to our postgraduate students.

Academic requirements:

- PhD in Science or Engineering.
- Postdoctoral or equivalent experience.

Experience and skills:

- Experience in scientific research in optics and the publication of peer-reviewed publications

in reputable journals. A minimum of 5 publications is required; the candidate must be main the author in at least two of them (first author or corresponding author).

- Experience in the dissemination of scientific knowledge (for example, academic seminars, popular articles, conference participations and proceedings).

Aspects that will be taken into consideration:

- Experience in thesis supervision.
- Experience in obtaining funds for research.
- Potential to carry out independent research, which will be evaluated mainly by the candidate's publications in high-impact journals.
- Experience in obtaining projects within the social, governmental or productive sectors.
- Ability and willingness to carry out interdisciplinary work and to interact with other groups at CICESE and neighboring institutions, on topics such as biophotonics, quantum optics and information, optical communications, renewable energies and nano-photonics, to name a few examples.

Activities:

- Carry out original and cutting-edge research in the candidate's area of expertise.
- Teach graduate courses in optics.
- Supervise master's and doctoral theses in optics.
- Propose research projects and seek funding for research.
- Collaborate on multidisciplinary projects with other researchers of the Department of Optics and of other research centers.
- Participate in the activities of the academic life of the Department of Optics, such as the development of new courses as well as updating existing courses, science dissemination activities, promotion of our programs, among others.

EVALUATION PROCEDURES:

The applications will be reviewed by an internal Department of Optics committee that will make a pre-selection among those that meet the "Characteristics and Requirements" described above. After this pre-selection, the files will be turned over to an external Selection Committee, which will choose the candidates to be interviewed and invited to present a job proposal and a departmental seminar. The recommendation of the Selection Committee will be submitted to the Internal Council of the Division of Applied Physics and, subsequently, to the Internal Technical Advisory Council. Final approval will be granted by the Director General of CICESE. If no application meets the profile sought, the contest will be declared void and a new call will be published.

SALARY:

The researcher's income will be based on the following: (a) A salary that depends on the category assigned to the candidate; (b) benefits such as medical insurance, savings fund, and others; (c) productivity bonuses.

In addition, CICESE researchers have the possibility of supplementing their income by requesting a scholarship from the Sistema Nacional de Investigadores (SNI, National System of Researchers).

REQUIRED DOCUMENTS:

- Updated Curriculum Vitae.
- Letter of Purpose that expresses what the candidate would contribute to the institution.
- Two letters of recommendation; these must be sent directly to the Head of the Department by the recommenders (not by the applicants).
- Official documentation that certifies your highest level of studies.

Documents must be sent via email and in PDF format.
